amount of trouble on the high sens and along the coasts. Efforts to overcome it have been made with varying degrees of success. Submarine bells furnish a certain amount of protection, while whistles serve as a warning over a limited area, but if Marconi has succeeded in furnishing the mariners with a simple piece of mechanism which will put an end to disasters of a certain chass on the water it should be halled with delight and every vessel should be equipped therewith both for its own protection and for the safety of others. Marconi has made some most valuable contributions to science by his inventions but there are reasons to believe that he has not are reasons to believe that he was so excited that

are reasons to believe that he has not as yet reached the limit of his skill.

HIGH COST OF GASOLINE.

For some time the high cost of gasoline been especially felt by these who depend upon it for motive power and there has been illtile or no progress made in the efforts which have been launched to bring about a reduction. There was an interesting flurry caused by the claims that new methods of manufacture which would make the cost of production considerably less would result in the dropping of the relating price and not a little hope was raised by the reports that investigations are fluids for the driving of internal combustion engines, but whatever may result from these idees in the future that it was a class in domestic hydrogen than the results from these idees in the future that it was cuch as perfectly bade of the first first production considerably less would result in the dropping of the relating for the driving of internal combustion engines, but whatever may result from these idees in the future that it was cuch a perfect but the same promotions and recompenses are open to tell my wife that the price of france in the front, are subject to the same discinction, a lot of somebodies were looking at lot of

"Thank you, young ladles," said teacher in gratified tones. "You have displayed great intellgence and acumen and architects might do well to consult you before going further!"
"They trooped out right over me and never saw me," mourned the owner. "I haven't recovered yet!"
"Well," said his friend, "at any rate you know now why flat eleven doesn't rent!"—Chicago Nows.

Stories of the War

American Aviators in France. American aviators in the service of

volunteer is not long, for the is an apt oupll and gets through the eight different classes of instruction in a month's time.

None of the Americans has accounted for as many adversaries as Garros Gilbert, Pegoud, Guynemer, or Navarre, but their services are none the less appreciable. Their recompense and citations in the orders of the day are not for spectacular performances but for "courage," coolness," "audacity," "presence of mind" and generally "excellent qualities as pilots" and efficient regular work in bombarding expeditions.

Lisutenant William Thaw, of Pritsburgh, earned his stripes by partion.

McConnell and Chapman came very cleveriy out of a heavy fire by Ger-

Lisutemant William Thaw, of Phts. burgh, earned his stripes by particularly good observation work, while the efficiency of Elliott Cowdin, of New Tork, has been shown in bombarding expeditions in the course of which he has accounted for two German machines, earning two citations in the orders of the army and two palms on the ribbon of the war cross.

Serpeant Norman Prince, of Prides Crossing, Mass., also sarned a citation for carrying out bombarding missions with a stubborn disregard for German shrappel. Corporal J. M. McConnell. of Carthage, N. C., and Sergeant Hall, of Galveston, Tex., have seen less service and had less sinning of their training.

END DE LES LES William (rooke Are you polluting your sight? Just as a filter purifies water, so this wonderful optical glass filters out or absorbs the dangerous elements which exist in all daylight and artificial light. The harmful rays in sunlight or electric light are invisible, but their existence is

known and readily proven. Because they are invisible they do not help us to see. To destroy those rays before they can enter the eye has been the problem of scientists for years.

A great British authority, the venerable Sir William Crookes, discovered the secret of compounding a formula for glass-making which produced this happy effect without dimming or perceptibly changing the

To commemorate his gifts to posterity, this has been

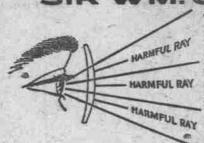

Sir William Crookes Glass

Eminent oculists and optometrists the world over have endorsed Sir William Crookes glass. It is regarded as one of the most important discoveries in the realm of modern optics.

Sir William Crookes glass has little or no perceptible color. It is cool and pleasant to wear, no matter what your prescription may be.

SIR WM. CROOKES

The great English scientist, worked for six years to invent a material for eyeglass lenses that would filter the harmful ultra-violet and heat rays out of both day-ARMPUL RAY light and artificial light, It will take us just about six

seconds to show you what a blessed relief these wonderful Crookes Lenses are to tired, strained eyes. They absolutely prevent one of the most frequent causes of eye strain and headaches.

No accidents worth mentioning have happened to them since the be-ginning of their training. The hard school of war, which, alone can give the experience neces eary to equip men for military aviation, is developing pilots here of the highest order largely for the benefit of the United States. The Franco American Corps will furnish officers and instructors capable of rapidly constituting the flying corps that may one day be needed in America.

NORWICH, CONN. 203 MAIN ST. 9 A. M. to 8 P. M. Lady Asistant

DO YOU enjoy carrying a pail of coal? Is there any fun in sifting the ashes?

Can anyone get any enjoyment out of cooking a meal in a roasting hot kitchen?

In the smothering heat of the Summer is there any pleasure in constantly living in coal dust, coal smoke, and rub, rub and scour from morning till night?

Does anyone really love hard work as well as that? Don't we all like to take life easy and make it as comfortable as possible?

There is only one way to do that-banish the coal stove and all the drudgery and hard work goes with it.
Then bring in the GAS RANGE and with it some comfort and economy, for not only is gas more convenient than coal but it costs less to operate.
